State Geological Survey .-- To County Surrevors Throughout the State of Michigan.

It has appeared to me that a portion of the legitimate objects of the Geo-logical Survey of the State, might be promoted by directing the attention of acting and former County Surveyors, to the Topography of their respective Counties.

Your pursuits lead you into every quarter of the inhabited portion of the State, and often many miles beyond the limits of the settlements, and the nature of your duties is such, that you unavoidably notice the topographical features of the districts you survey. Many of you are by this means already placed in possession of an accurate and detailed knowledge of the topography of one or more counties. All this information collected together, with that which is still readily obtainable, would constitute a mass of facts of immense intending to emigrate to our State.

The object of this circular is to re-

quest you to prepare written accounts of the Topography of your respective counties, to be transmitted to me, to serve as material in the preparation of mineral springs, or springs of sweet water of unusual copiousness; the prevailing kinds of timber; the color, fineness and productive qualities of the soil; whether abounding in gravel, sand, clay or vegetable matter—these are all clay or vegetable matter—the v characters which it would be well to embrace in an account of the topography of county.
